James Holmes killed or wounded seventy people in a movie theater in Aurora, Colorado. Only one man was allowed to record extensive interviews with the shooter. This is what he found. On July 20, 2012 in Aurora, Colorado, a man in dark body armor and a gas mask entered a midnight premiere of *The Dark Knight Rises* with a tactical shotgun, a high-capacity assault rifle, and a sidearm. He threw a canister of tear gas into the crowd and began firing. Soon twelve were dead and fifty-eight were wounded; young children and pregnant women were among them. The man was found calmly waiting at his car. He was detained without resistance. Unlike the Columbine, Newtown, San Bernadino, and Las Vegas shootings, James Holmes is unique among mass shooters in his willingness to be taken into custody alive. In the court case that followed, only Dr. William H. Reid, a distinguished forensic psychiatrist, would be allowed to record interviews with the defendant. Reid would read Holmes' diary, investigate his phone calls and text messages, interview his family and acquaintances, speak to his victims, and review tens of thousands of pages of evidence and court testimony in an attempt to understand how a happy, seemingly normal child could become a killer. *A Dark Night in Aurora* uses the twenty-three hours of unredacted interview transcripts never seen by the public and Reid's research to bring the reader inside the mind of a mass murderer. The result is a chilling, gripping study of abnormal psychology and how a lovely boy named Jimmy became a killer.

The statistics are appalling. Between 8% and 10% of U.S. high school students carry guns to school every day. In a typical mid-size city, 30 to 50 cases of school violence are reported daily, and half of these cases involve guns. *School Violence: Assessment, Treatment, Prevention* shows us the reality behind the statistics. Its distinguished contributors include leading clinicians, researchers, school counselors, and legal authorities who closely examine every aspect of this complex epidemic, challenging us to solve this multifaceted public health problem and offering concrete recommendations on how to do it. The comprehensive volume is divided into four parts: Part I, *Contributing Factors*, presents the multiple contributing factors, including those involved in creating violent children and violence-prone schools, the nature and context of school violence, and its biological and cultural causes. For example, although the number of violent deaths by shooting in schools remained stable through the 1990s, the number of violent acts against female students increased significantly, as did gang activity and the availability of guns in schools. Part II, *Assessment and Management*, details diagnostic assessment, management, and treatment of children and adolescents who have the potential for or have threatened school violence. Eyewitnesses describe the shootings and their aftermaths in Pearl, Mississippi, and Littleton, Colorado, including the extensive measures taken to decrease the traumatic effect of these incidents on the children and adolescents and their families, the educators, and the community at large. Also presented is a model for time-limited, cognitive-behavioral group therapy for those who sustain or witness violent injuries in schools -- a model that could be adapted to other settings. Part III, *Legal Aspects*, begins by putting us on notice that anyone aware of a potentially violent act by a youth has a legal responsibility to alert the intended victim(s) and others who could warn or protect them, offering a uniquely insightful view -- by the plaintiff attorney for the victims of school violence in Paducah, Kentucky -- of the *Tarasoff* case and its ramifications. Part IV, *Prevention*, concludes with what we can do now to help prevent school violence, detailing effective prevention measures that range from the innovative (a method that focuses on the school as a whole rather than on individuals and uses a social system and power-

dynamics perspective) to the everyday (teaching tolerance and conflict resolution). Psychiatric practitioners, clinical social workers, pediatricians, art and activity therapists, school counselors and administrators, and other educators and mental health care professionals -- and concerned adults -- who want to help prevent violence in our schools and minimize its traumatic effects on children, parents, and the community at large will appreciate this lucid, in-depth treatment of what has become one of today's most disturbing issues.

This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare's *A Comedy of Errors*. Miola's edited work also features a comprehensive critical history, coupled with a full bibliography and photographs of major productions of the play from around the world. In the collection, there are five previously unpublished essays. The topics covered in these new essays are women in the play, the play's debt to contemporary theater, its critical and performance histories in Germany and Japan, the metrical variety of the play, and the distinctly modern perspective on the play as containing dark and disturbing elements. To compliment these new essays, the collection features significant scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficulty accessible journals, newspapers, and other sources. This collection brings together these essays for the first time.

In this book, the IOM makes recommendations for permitting independent practice for mental health counselors treating patients within TRICARE--the DOD's health care benefits program. This would change current policy, which requires all counselors to practice under a physician's supervision without regard to their education, training, licensure or experience.

This plainspoken, research-based guide offers you practical, direct advice on the important contributions primary care clinicians can make to the well-being of every patient, in every encounter. Features: \* Provides guidance on behavioral issues for primary care clinicians \* Best available evidence-based, solutions-oriented guide to the patient issues you face daily \* Clear answers on families with parenting and developmental issues, and children and adolescents with behavioral problems \* Ways to ease patients reactions to illness and assist in changing behaviors that prolong, perpetuate, or exacerbate their distress \* Effective ways to help patients modify behaviors that increase their risk for illness and disease \* Useful, current answers on complex issues such as sexual problems and eating disorders \* Identifying and treating cases of abuse and violence \* Strategies for caring for patients you find difficult, overcoming patient resistance, and encouraging therapeutic cooperation \* Realistic guidelines on helping with end-of-life, loss, and grief issues \* Evidence-based help with explicit psychological symptoms and syndromes, including anxiety, panic, post-traumatic stress disorder, and somatoform symptoms \* What every clinician needs to know about managing depression as a chronic disease \* Tips that can make the partnership between you and your patients more comfortable and easy every day Other titles in the 20 Common Problems series include Dermatology, End of Life, Ethics, Pediatrics, Preventive Health, Primary Care, Surgery, Urology, and Women's Health Care.
