As long as the main unit is powering up, you can move down the line to the external amplifiers. If your car doesn't use any amps in the system (check your repair manual to find out), you can move on to the speaker testing step in stereo troubleshooting. If you do have a centrally functioning external amp on the next step down the line, or you have remote amplifiers that mount at each speaker, you need to test your amp to see if they are getting power.
