Continental F163 Flathead 4 Cylinder Engine Machining & Rebuild at Motor Mission Machine & Radiator. This is a Continental F163 flathead 4-cylinder gasoline engine we rebuilt for a Clark forklift. We completely disassembled the engine and put the block, crank, rods, & cylinder head in our Bayco oven to be completely thermal cleaned. After the thermal cleaning we put the parts in our Zero shotblaster before performing a magnaflux and pressure test on the engine block and cylinder head to make ...

Continental F163 Flathead 4-Cylinder Engine Machining –

The Continental A40 engine is a carbureted four-cylinder, horizontally opposed, air-cooled aircraft engine that was developed especially for use in light aircraft by Continental Motors. It was produced between 1931 and 1941.

Continental A40 – Wikipedia

Continental has eight basic four-cylinder and ten six-cylinder L-Head type engines, ranging in size from 56 to 427 cubic inch displacement. The combustion chamber design has been tai- lored for the required turbulence, charge flow and burning characteristics to provide dependable and economical heavy duty service.

CONTINENTAL L-HEAD – Weldmart-Online

Petronix is the leading producer of electronic distributors for gas, propane and LP powered industrial engines. Many Wisconsin and Continental engines are equipped with our industrial distributors from the factory. Proven performance, reduced maintenance downtime, improved economy, faster starts and extended tune-up intervals.

Petronix D41-05A Distributor Industrial for Continental 4 –

In 1905, Continental Motors was born with the introduction of a four-cylinder, four stroke cycle L-head engine operated by a single camshaft. In August 1929, the Continental Motors Company formed the Continental Aircraft Engine Company as a subsidiary to develop and produce its aircraft engines. Continental Motors entered into the production of automobiles rather indirectly.

Continental Motors Company – Wikipedia

Later the 162 became the 163, same bore and stroke different cranks blocks and heads. The F series was also made in several different 6 cylinder sizes. I can think of 4 other series of Continental L-head (flathead) engines with different letters the B, N, M & Y models plus others in earlier time frames. Does that help?

Continental engine casting numbers – Yesterday's Tractors

Finally, a place where you can buy any and all of the parts available for the old Continental engines in one place. Whether the engine is in a forklift, a welder, a tractor, or a skidsteer we can help. We can provide diesel engine parts, gasoline engine parts, or engine rebuild kits for the consumer or the repair shop.

CONTINENTAL ENGINE PARTS

I recently purchased a 1928 (I think) Childs Fire Engine with a Selden chassis. It has a Continental flathead 6 cylinder in it with engine number 6B-2614. Can anyone give me some info on this engine such as displacement, horsepower, etc.?

Continental 6B engine

Engine 112 113 The Ford 4-cylinder engine (figs. 1 and 2) is Of the L-head type, having all cylinders and the upper half Of the crankcase cast in one piece. Steel cylinder sleeves are used, which are easily replaced when rebuilding the engine. The distributor is driven directly from the front end of the camshaft.

Ford – 120 – 4-Cylinder Industrial Engine Manual

F162 is the model number, 540 is the specification number, and 135348 is the serial number. Do some searches on Ebay for "Continental manual" and you will likely find a manual for it. There are some other series Continental 4 cylinder engines, smaller and larger, and some with overhead valves. The F162 engines were extremely common in forklifts.

Electronic Ignition Conversion Kits for Industrial Engines –

Most of the time the engine acts just the same as it would without the supercharger. In other words, the Kaiser Manhattan has a dual purpose engine; in normal operation it is an efficient and economical six-cylinder flathead, but when you really step on the gas it gives you all the jump of a large V-8 overhead-valve job.
