countertransference may attach
itself to our way of listening and
thinking about patients, to our
efforts at interpretation, to the
process of working through, or to
the complex issue of termination.

In relational psychoanalysis, the term enactment is used to describe the non-reflecting playing out of a mental scenario, rather than verbally describing the associated thoughts and feelings. The term enactment was first introduced by Theodore Jacobs (1986) to describe the re-actualization of unsymbolized and unconscious emotional experiences involved in the relationship between the patient

It is generally accepted that the countertransference enactment may have valuable aspects that can be discussed between patient and therapist. In the Menninger Treatment Intervention Project 5 , audiotaped transcripts of psychotherapy with patients who had borderline personality disorder were studied by a team of researchers, revealing numerous examples of these enactments.

The role of countertransference in contemporary ...

Abstract. In his seminal paper on acting out, Freud (1914) wrote:

Get Free Countertransference

“We render the compulsion [to repeat] harmless, and indeed useful, by giving it the right to assert itself in a definite field. We admit it into the transference as a playground in which it is allowed to expand in almost complete freedom and in which it is expected to display to us everything in the way of pathogenic instincts that is hidden in the patients mind” (p. 154).
