Quick Reference Guide to html and CSS
Some values can be omitted in border, which will force the CSS engine to assign initial values. One value: border: <border-style> If border is assigned only a single value, it must be the <border-style>; the border will be invisible if it is not defined. CSS will then take the initial values of the border width (medium) and color (currentcolor). The width is computed to be around 3px, and the color will be the text color or the foreground color of the element.
