"This work was first published by Oxford University Press in 2005 as Why Geography Matters: Three Challenges Facing America."

Harm de Blij contends in this book that geography continues to hold us all in an unrelenting grip and that we are all born into natural and cultural environments that shape what we become, individually and collectively.

Ever since humans sketched primitive maps in the dirt, the quest to understand our surroundings has been fundamental to our survival. Studying geography revealed that the earth was round, showed our ancestors where to plant crops, and helped them appreciate the diversity of the planet. Today, the world is changing at an unprecedented pace, as a result of rising sea levels, deforestation, species extinction, rapid urbanization, and mass migration. Modern technologies have brought people from across the globe into contact with each other, with enormous political and cultural consequences. As a subject concerned with how people, environments, and places are organized and interconnected, geography provides a critical window into where things happen, why they happen where they do, and how geographical context influences environmental processes and human affairs. These perspectives make the study of geography more relevant than ever, yet it remains little understood. In this engrossing book, Alexander B. Murphy explains why geography is so important to the current moment.

Accompanying Study Guide to Geography: Realms, Regions and Concepts. The best-selling book in the World Regional Geography market, *Regions* provides general readers with up-to-date information on various topics around the world. It delivers the authors' authoritative content, outstanding cartography, currency, and comprehensive coverage, in a technology-rich package. The 14th edition reflects major developments in the world as well as in the discipline. These range from the collapse of Russia's Post-Soviet transformation to the impact of globalization and from the rise of Asia's Pacific Rim to the war in Iraq. Readers will find accurate data and information in this streamlined resource.

This solid introduction provides an overview of world regional geography and is strongly grounded in spatial concepts and linked to basic systematic geography. Organized according to developed and less developed regions, it covers the human and physical foundations of world geography, Europe, the Soviet Union, North America, Australia, Japan, Middle and South America, Africa, Southwest Asia, South Asia, China and Southeast Asia. As with previous editions, the Sixth Edition features outstanding illustrative material and a full-color cartographic program but also incorporates four major chapter revisions, substantial updating and new chapter on opening maps. Among the major topics covered are regional concepts and classification, culture and landscape and physical-environmental dimensions. Specifics for each region are also discussed such as changing natural environment; history, settlement, population, politics, economics and their impact; industrialization and urbanization; environmental hazards and much more.

Anyone interested in learning about geographic concepts will appreciate this concise book that highlights the most important concepts. The fifth edition presents authoritative content, currency, and outstanding cartography. It continues to build on its strength for understanding maps with the help of additional question types. New coauthor Jan Nijman also helps provide a current view of the field. With its up-to-date information and accessible introduction, this book is engaging for any reader.

Over the next half century, the human population, divided by culture and economics and armed with weapons of mass destruction, will expand to nearly 9 billion people. Abrupt climate change may throw the global system into chaos; China will emerge as a superpower; and Islamic terrorism and insurgency will threaten vital American interests. How can we understand these and other global challenges? Harm de Blij has a simple answer: by improving our understanding of the world's geography. In *Why Geography Matters*, de Blij demonstrates how geography's perspectives yield unique and penetrating insights into the interconnections that mark our shrinking world. Preparing for climate change, averting a cold war with China, defeating terrorism: all of this requires geographic knowledge. De Blij also makes an urgent call to restore geography to America's educational curriculum. He shows how and why the U.S. has become the world's most geographically illiterate society of consequence, and demonstrates the great risk this poses to America's national security. Peppering his writing with anecdotes from his own professional travels, de Blij provides an original treatise that is as engaging as it is eye opening. Casual or professional readers in areas such as education, politics, or national security will find themselves with a stimulating new perspective on geography as it continues to affect our world.

A penetrating look at the geographical framework of the contemporary world using the geographic perspective and geography's spatial terminology to investigate the globe's great geographic regions. Features complete, balanced and in-depth coverage of human culture, historical, physical and economic geography along with the very latest developments and implications. As in previous editions, this one contains outstanding illustrative materials including over 200 detailed maps.

*The World Today* is the number one bestselling brief World Regional Geography textbook. The seventh

## Read Book De Blij Ch 1 Study Guide 2

edition continues to bring readers geographic perspectives on a fast-changing world through the regional view. Restructured chapters provide a macro review of important physical, cultural, and political characteristics, drawing upon up-to-date significant world events and crises. The cartographically superior maps have been updated for the seventh edition to offer an accurate and vast picture of the world--multi-layer, interactive, GIA maps have been added to WileyPLUS Learning Space. To complement the extensive map program, the majority of the photos have been taken by our authors during their field research, allowing the student to experience an authentic geographical viewpoint of our world.
