Discusses the origins, values, and celebrations of Kwanzaa, and offers historical and cultural background information

Maat is the moral ideal of ancient Egypt whose texts contain information on Egypt's moral standards, its concepts of right from wrong, codes of behaviour and obligations. Written by a teacher of the tradition of Maat, this study is the `first philosophical book that is based on a philologically and historically critical treatment of first-hand Egyptian material'. Focusing on

the Maatian ideal rather than moral practices, Karenga discusses what Maat is and its place within the genre of philosophical ethics and morality, asking what it can contribute to modern African culture and values. Extracts are transcribed and translated into English.

The Handbook of Black Studies is the first resource to bring together research and scholarship in the field of African-American studies in one volume. Editors Molefi Kete Asante and Maulana Karenga, along with a pre-eminent group of contributors, examine various aspects of the field of Black Studies. Organized into three parts, this Handbook explores historical and cultural foundations, philosophical and conceptual bases, and critical and analytical concepts.

This is the story of the influential black nationalist organization--the Us Organization--and its leader Maulana Karenga, the man who invented Kwanza.

In *Fighting for US*, historian Scot Brown presents the first comprehensive account of the US Organization, a California-based group that played a leading role in Black Power politics and culture during the late 1960s and early 1970s. Founded in 1965 by Maulana Karenga, US developed an extensive network of activists, artists, and organizations throughout the United States for the purpose of igniting an African American cultural revolution. Brown examines US's philosophy, internal dynamics, political activism, and influence on African American art, drawing from organizational archives, interviews, Federal Bureau of Investigation files, newspaper accounts, and other primary sources of the period. Engaging and original, *Fighting for US* is the definitive work on the US organization, Maulana Karenga, and Black cultural nationalism in America.

In this book, the most prolific contemporary African American scholar and cultural theorist Molefi Kete Asante leads the reader on an informative journey through the mind of Maulana Karenga, one of the key cultural thinkers of our time. Not only is Karenga the creator of Kwanzaa, an extensive and widespread celebratory holiday based on his philosophy of Kawaida, he is an activist-scholar committed to a "dignity-affirming" life for all human beings. Asante examines the sources of Karenga's intellectual preoccupations and demonstrates that Karenga's concerns with the liberation narratives and mythic realities of African people are rooted in the best interests of a collective humanity. The book shows Karenga to be an intellectual giant willing to practice his theories in order to manifest his intense emotional attachment to culture, truth and justice. Asante's enlightening presentation and riveting critique of Karenga's works reveal a compelling account of a thinker whose contributions extend far beyond the Academy. Although Karenga began his career as a student activist, a civil rights leader, a Pan Africanist, and a culturalist, he ultimately succeeds in turning his fierce commitment to truth toward dissecting political, social, and ethical issues. Asante carefully analyzes Karenga's important works on Black Studies, but also his earlier works on culture and his later works on ethics, such as *The Husia*, and *Odu Ifa: The Ethical Teachings*.

*Kwanzaa: Black Power and the Making of the African-American Holiday Tradition* explores the beginning and expansion of Kwanzaa, from its start as a Black Power holiday, to its place as one of the most mainstream black holiday traditions.
