circumstances in the process of tailoring the approaches to the conditions that characterize societies of different cultural, institutional, and economic settings.

Designed to improve the accessibility, interoperability, and affordability of spatial data, the book focuses

Online Library Engineering

on the increasing challenges associated with integrating individuals and organizations into a network to support (1) public authorities and administrations at various levels, (2) thematic user communities, (3) enterprises, and (4) citizen-oriented society as a whole. It addresses

Online Library Engineering

the implementation and development of spatial data infrastructures for a wide range of themes, applicable technical standards and protocols, and specific organizational issues unique to data policy. Highlighting the potential for profound changes to the access, use, and exchange of spatial data for citizens,
