Psychology research papers are quite often assigned to students and that leads to a lot of sleepless nights. But writing such a paper doesn't have to be that hard. If you choose a subject you are passionate about, half of the work is done. With a thorough research you complete the other half and wiring the paper will be a piece of cake.

WRITING FOR PSYCHOLOGY. Fourth Edition offers concise assistance for students writing their research analyses using APA style. By providing concrete examples of common errors, the authors show rather than merely tell students what to do and what to avoid. This manual will help students adhere to the basics of APA style; refine critical thinking skills, library search skills, revising skills, editing skills, and proofing skills; and avoid plagiarism. Checklists precede a summary at the end of every chapter, giving students the chance to make sure they have been thorough in their reports. A new career in academia can be a challenge. While academia's formal rules are published in faculty handbooks, its implicit rules are often difficult to discern. Like its first edition, this expanded volume contains practical advice to help new academics set the best course for a lasting and vibrant career. problems beginning social scientists will face. Leading academics share the lessons they have learned through their own hard experience. Individual chapters present the ins and outs of the hiring process, the advantages of a post-doctoral fellowship, expert strategies for managing a teaching load, insider and applicant advice for winning a research grant; detailed instructions for writing and publishing a journal article; and an explanation of intellectual property issues. The text also addresses the latter stages of a career. It offers suggestions for keeping one's career dynamic. Chapters that provide specific information for minorities, women and clinical psychologists are also included, and the volume even presents options for working outside of academia.

"Reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor. Recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts, the Publications and Communications (P&C) Board of the American Psychological Association (APA) invited two task forces of researchers to develop standards for reporting quantitative and qualitative research in journal articles. The Quantitative Journal Article Reporting Standards Working Group developed standards for quantitative research, and a separate book details those standards. This book discusses the reporting standards. It permits the space to expand on the ideas in those standards and to articulate the rationale behind each. It articulates decisions one may need to make as an author as one decides how to present their work. It also provides examples to illustrate a strong presentation style, and these can serve as helpful models. It provides the conceptual undergirding for the reporting decisions that authors make during the writing process. The book considers the typical sections of a qualitative research paper7the introductory sections, Method, Results, and Discussion. Guidance is provided for how to best present qualitative research, with rationales and illustrations. The book presents reporting standards for qualitative meta-analyses, which are integrative analyses of findings from across primary qualitative research. The book includes a discussion of objectivist and constructivist rhetorical styles in research reporting"--Preface. (PsycINFO Database Record (c) 2020 APA, all rights reserved).
