Monarchs, specifically King John, from absolute rule. The Magna Carta was the result of disagreements between the Pope and King John and his barons over the rights of the king: Magna Carta required the king to accept that the will of the king could be bound by law. The Code of Hammurabi was a Mesopotamian legal code that laid a foundation for later Hebraic and European law. The Magna Carta is widely considered to be the first step in a long historical process leading to the rule of constitutional law and is one of the most famous documents in the world. Originally issued by King John of England (r.1199-1216) as a practical solution to the political crisis he faced in 1215, Magna Carta established for the first time the principle that everybody, including the king, was subject to the law. Although nearly a third of the text was

deleted or substantially rewritten within ten years, and almost all the clauses have been repealed in modern times, Magna Carta remains a cornerstone of the British constitution. Most of the 63 clauses granted by King John dealt with specific grievances relating to his rule. However, buried within them were a number of fundamental values that both challenged the autocracy of the king and proved highly adaptable in future centuries. Most famously, the 39th clause gave all 'free men' the right to justice and a fair trial. Some of Magna Carta's core principles are echoed in the United States Bill of Rights (1791) and in many other constitutional documents around the world, as well as in the Universal Declaration of Human Rights (1948) and the European Convention on Human Rights (1950). This translation is considered to be the

This work addresses the homeostatic balance between the birth and death of cells in tissues, organs and organisms and emphasizes the molecular processes involved in cellular cycles. Aimed at undergraduates, this book is illustrated, using line drawings and cartoons to explain the concepts involved. It should be of use to those studying biology, biomedicine and medicine, and to those involved in laboratory-based cancer studies.

The challenges of teaching history are acute where we consider the world history classroom. Generalized world history courses are a part of many, if not most, K-12 curricular frameworks in the United States. While United States history tends to dominate the scholarship and conversation, there are

an equally wide number of middle-level and secondary students and teachers engaged in the study of world history in our public schools. And the challenges are real. In the first place, if we are to mark content coverage as a curricular obstacle in the history classroom, generally, then we must underscore that concern in the world history classroom and for obvious reasons. The curricular terrain to choose from is immense and forever expanding, dealing with the development of numerous civilizations over millennia and across a wide geographic expanse. In addition to curricular concerns, world historical topics are inherently farther away from most students' lives, not just temporally, but often geographically and culturally. Thus the rationale for the present text, *Hollywood or History? An Inquiry-Based*

Strategy for Using Film to Teach World History. The reviews of the first volume *Hollywood or History? An Inquiry-Based Strategy for Using Film to Teach United States History* strategy have been overwhelmingly positive, especially as it pertains to the application of the strategy for practitioner. Classroom utility and teacher practice have remained our primary objectives in developing the *Hollywood or History?* strategy and we are encouraged by the possibilities of Volume II and the capacity of this most recent text to impact teaching and learning in world history. We believe that students' connection to film, along with teachers' ability to use film in an effective manner, will help alleviate some of the challenges of teaching world history. The book provides 30 secondary lesson plans (grades 6-12) that address nine eras
