A child should learn to copy basic pre-writing patterns and shapes. Beery (1997) proposed that a child will be ready for formal instruction in handwriting if they manage to master the first 8 figures of the Developmental Test of Visual-Motor Integration (VMI). Focus on precision of the following shapes: 11

Handwriting Development

4. Bilateral coordination is essential. When we write, we need to easily coordinate both sides of your body for effective posture, holding the paper, moving the pencil, erasing, using margins, and filling in given spaces on worksheets. Forming letters requires pencil strokes that involve moving to the midline.
