Matt Keegan interviews artists and commissions writing to reassess the 1990s as the moment when the Democratic Party abandoned its New Deal values and swung to the right In the wake of the Trump election, artist Matt Keegan (born 1976) began investigating the Democratic Party's shifts over recent decades. In the late '90s, members of the Democratic Leadership Council successfully moved the party's platform to the right by including a pro-business, pro-military, interventionist agenda, and downplaying social infrastructure as a calculated break from its New Deal-era foundation. This shift led to Bill Clinton's consecutive terms. 1996 captures this pivotal time in American politics and society through the experience of artists who completed their undergraduate studies in that year and voted for Clinton, and others who were born in 1996 and voted for the first time in 2016. Essays focus on cultural and ideological shifts from that time, such as the 1994 Crime Bill, 1996 Immigration Act, the Telecommunications Act, the start of Fox News and beyond.

Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

From award-winning musician and composer Warren Ellis comes the unexpected and inspiring story of a piece of chewing gum. Featuring an introduction from Nick Cave. 'Warren has turned this memento, snatched from his idol's piano in a moment of rapture, into a genuine religious artefact.' NICK CAVE 'In praise of meaning-rich relics and magical things. Totally heartwarming project.' MAX PORTER 'A unique study of a fan's devotion, of transcendence and of the artistic vocation - it's got depth and great warmth. It's a beautiful piece of work.' KEVIN BARRY On Thursday 1 July, 1999, Dr Nina Simone gave a rare performance as part of Nick Cave's Meltdown Festival. After the show, in a state of awe, Warren Ellis crept onto the stage, took Dr Simone's piece of chewed gum from the piano, wrapped it in her stage towel and put it in a Tower Records bag. The gum remained with him for twenty years; a sacred totem, his creative muse, growing in significance with every passing year. In 2019, Cave - his collaborator and great friend - asked Warren if there was anything he could contribute to display in his Stranger Than Kindness exhibition. Warren realised the time had come to release the gum. Together they agreed it should be housed in a glass case like a holy relic. Worrying the gum would be damaged or lost, Warren decided to first have it cast in silver and gold, sparking a chain of events that no one could have predicted, one that would take him back to his childhood and his relationship to found objects. Nina Simone's Gum is about how something so small can form beautiful connections between people. It is a story about the meaning we place on things, on experiences, and how they become imbued with spirituality. It is a celebration of artistic process, friendship, understanding and love.

The Ford Boss Mustang is the most iconic pony car ever created, and this book covers it more extensively than any other. Boss Mustang: 50 Years—a fully expanded version of Mustang Boss 302—includes the complete history of its creation; racing and street histories of both the 302 and 429 models; and photos and interviews with Boss Mustang designers, engineers, racers, and more. Of all the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine and option package for SCCA Trans-Am racing, the Mustang Boss 302 debuted for the 1969 model year and was built in limited numbers for the street through 1970. This book features never-before-seen production and racing photography, interviews with designers and engineers, and keen insight from author Donald Farr, a renowned Ford historian and Ford hall-of-fame inductee. Designed by the legendary Larry Shinoda, the Boss cars were easily distinguished from their less potent stablemates by their race-bred powerplant, standard front spoiler, and bold graphics. In 2012, Ford at long last revived this most revered of all Mustang models. With a new racing counterpart and a modern street version that delivers more than 440 horsepower, the Boss was truly back! In 2013, Ford rolled out the Boss one more time. In Boss Mustang: 50 Years, Mustang historian Donald Farr offers a complete history of the car—from its late 1960s origins in Ford's boardrooms through its Trans-Am successes and untimely demise in 1970, up to the conception and development of the spectacular, limited-edition 2012 and 2013 Boss Mustangs. Packed with brilliant photography and firsthand accounts from the people who created the original Boss, as well as the team that resurrected Ford's most iconic Mustang for the 21st century, this is the story every Mustang enthusiast has been waiting to read.
