To create the API

Get Free Java Api

Documentation, the
captains of Java
ran a program
called javadoc. The
javadoc program
took lines like
these right out of
the
PrintStream.java
file and used the
lines to make the
documentation
that you see in
your web browser.

Java's API*

*Documentation -
dummies*

This tool is used to
create a standard
documentation of
Java code in HTML
file format. In fact,
Java officially uses

Get Free Java Api

Documentation
this tool to create its own library API documentation. To make Java code documentation ready, one must adhere to certain norms while writing the code so that the javadoc tool is able of run through the java file and create the API documentation.
