Russell's knowledge of the regions Jet traverses, their colourful characters and the layers of society, make the setting so tangible it slides off your forehead with grimy perspiration. I was under the impression that this was the final book in the series (could be wrong), but, true to the suspense genre, there are loose threads left dangling that might just trip Jet up again in the future.

Artemus Black. Perennially down-on-his-luck Hollywood PI whose Bogie fixation is as dated as his wardrobe. With an assistant who mocks him relentlessly, an obese cat that loathes him, a romantic life that's deader than Elvis, money problems, booze, nicotine, and anger management issues, how much worse can it get? When he takes a case that's supposed to be easy money working for a celebrity whose colleagues and surrounding paparazzi are dropping faster than interest in the star's big comeback, the cakewalk turns ugly and Black finds himself in a web of deceit, betrayal, and murder - and bad hair days. The first in a new series from bestselling author Russell Blake, Black is a detective mystery with a difference that fans of the genre are sure to enjoy.

"Night of the Assassin is the gritty, edge-of-your seat prequel to King of Swords. A no-holds-barred, breakneck-paced thriller, Night charts the early years of El Rey -- known as the King of Swords -- a super-assassin responsible for some of the world's most spectacular and daring executions. Framed against the backdrop of present-day Mexico's brutal narco-trafficking violence, Night of the Assassin chronicles the making of a monster -- a cold-blooded, ruthless killing machine. Raw, disturbing, edgy and unflinching, this epic saga defies convention to create a roller-coaster of intrigue, suspense and thrills that will leave even the most jaded thriller aficionados gasping for breath."--Back cover.

A stunning secret from Jet's past plunges her headlong into a dangerous operation that could well be her last. Immersed in a world of deceit and brutality, only her training and skills stand between her and disaster in a war-torn nation on the brink.

Popular science at its most exciting: the breaking new world of chronobiology - understanding the rhythm of life in humans and all plants and animals. The entire natural world is full of rhythms. The early bird catches the worm -and migrates to an internal calendar. Dormice hibernate away the winter. Plants open and close their flowers at the same hour each day. Bees search out nectar-rich flowers day after day. There are cicadas that can breed for only two weeks every 17 years. And in humans: why are people who work anti-social shifts more illness prone and die younger? What is jet-lag and can anything help? Why do teenagers refuse to get up in the morning, and are the rest of us really 'larks' or 'owls'? Why are most people born (and die) between 3am-5am? And should patients be given medicines (and operations) at set times of day, because the body reacts so differently in the morning, evening and at night? The answers lie in our biological clocks the mechanisms which give order to all living things. They impose a structure that enables us to change our behaviour in relation to the time of day, month or year. They are reset at sunrise and sunset each day to link astronomical time with an organism's internal time.

When a forgotten journal materializes decades after Drake Ramsey's father vanished in the Amazon jungle, Drake decides to follow in his footsteps and search for the legendary treasure of the Inca empire hidden in the lost Inca city of Paititi.

A fresh, unique insider's view of what it's like to be a woman aviator in today's US Navy!from pedicures to parachutes, friendship to firefights. Caroline Johnson was an unlikely aviation candidate. A tall blonde debutante from Colorado, she could have just as easily gone into fashion or filmmaking, and yet she went on to become an F/A-18 Super Hornet Weapons System Officer. She was one of the first women to fly a combat mission over Iraq since 2011, and one of the first women to drop bombs on ISIS. Jet Girl tells the remarkable story of the women fighting at the forefront in a military system that allows them to reach the highest peaks, and yet is in many respects still a fraternity. Johnson offers an insider's view on the fascinating, thrilling, dangerous and, at times, glamorous world of being a naval aviator. This is a coming-of age story about a young college-aged woman who draws strength from a tight knit group of friends, called the Jet Girls, and struggles with all the ordinary problems of life: love, work, catty housewives, father figures, make-up, wardrobe, not to mention being put into harm's way daily with terrorist groups such as ISIS and world powers such as Russia and Iran. Some of the most memorable parts of the book are about real life in training, in the air and in combat!how do you deal with having to pee in a cockpit the size of a bumper car going 600 miles an hour? Not just a memoir, this book also aims to change the conversation and to inspire and attract the next generation of men and women who are tempted to explore a life of adventure and service.
