Refine the skills needed to become an accomplished professional carpenter with the in-depth coverage and practical applications found in *Carpentry, 6E*. This popular bestseller by well-known expert Floyd Vogt presents the intricate system of contemporary light frame building construction using step-by-step procedures. *CARPENTRY, 6E* follows the logical path of a residential project, using thorough explanations and easy-to-follow diagrams to explore building plans, sitework and layout, footings and foundations, framing, interior and exterior surfaces, cabinetry, and more. This edition blends traditional construction techniques with today's latest practices, including contemporary safety tools, alternative construction, such as concrete forms, and green building techniques. This edition also introduces more commercial drawings and construction. Photo-realistic drawings showcase concepts and procedures with detailed, easy to understand information. The new online CourseMate provides interactive learning tools to further ensure carpentry success. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The NBC sets out technical provisions for the design and construction of new buildings in Canada. It also applies to the alteration, change of use, and demolition of existing buildings. The NBC is available in two volumes and comprises three divisions: A, B and C. Division A includes the compliance options, the objectives, and the functional statements. Division B contains the provisions, referred to as acceptable solutions, relating to such issues as fire protection, occupant safety and accessibility; structural design; environmental separation; heating, ventilating, and air-conditioning; plumbing services; safety measures at construction and demolition sites; and housing and small buildings. Division C contains administrative provisions. Volume 1 contains Divisions A and C along with the attribution tables of Division B. Volume 2 contains Division B, appendices, and index.

The architect's favorite handbook-more informative and easier to use than ever! The Architect's Studio Companion is the laborsaving design resource that architects and builders have relied on for years. Now in its fourth edition, this industry standard continues its reputation as a reliable tool for the preliminary selecting, configuring, and sizing of the structural, mechanical, and egress systems of a building. Bestselling authors Edward Allen and Joseph Iano reduce complex engineering and building code information to simple approximations that enable the designer to lay out the fundamental systems of a building in a matter of minutes and get on with the design. Now in a flex binding that makes it even easier to use, The Architect's Studio Companion, Fourth Edition provides quick access to reliable rules of thumb that offer vital help for selecting, configuring, and sizing: • Structural systems • Heating, cooling, and electrical systems • Egress provisions, including exit stairways, parking garages, and parking lots • Daylight provisions The book concludes with precalculated tables of building code height and area limitations.

Wilks provides a historical background, list of publications, and description of activities for most of the major science initiatives undertaken at the federal level. He surveys a wide range of government documents and monographic and serial science collections used by both faculty and students.
