NDC (New Distribution Capability) is a travel industry-supported program (NDC Program) launched by IATA for the development and market adoption of a new, XML-based data transmission standard (NDC Standard). The NDC Standard enhances the capability of communications between airlines and travel agents. The NDC Standard is open to any third party, intermediary, IT provider or non-IATA member, to implement and use.

Community development -- the economic, physical, and social revitalization of a community, led by the people who live in that community -- offers a wide range of exciting and rewarding employment options. But until now, there has been no "road map" for professionals, volunteers, students, or anyone wishing to become involved in the field. A Guide to Careers in Community Development describes the many different kinds of community development jobs available, ranging from community organizing, to financing housing and new businesses, to redeveloping brownfields. It offers advice on how to break into the field along with guidance for career advancement and lateral movement. Following an introductory chapter that offers an overview and definition of community development and its history,

A Guide to Careers in Community Development is an essential reference for anyone interested in working in the community development field, including graduate and undergraduate students, volunteers, and mid-career professionals seeking a more fulfilling line of work.

This book identifies, defines and explains in detail property-related environmental issues. It is written in an easy-to-follow style and presented in a lively format. Issues are explained with reference to relevant background information, practical issues and problems posed. The book is supported by current case studies, and there is learning material - with model answers - for students and lecturers to use for group work. Each topic - e.g. law, economics, property development - is structured in the same way: headline - the big issues and important questions; background - historical, legislative, technical; practical problems and solutions; discussion points; case studies; sources of information/further study.

Over several generations villagers of Dominica have been shifting from Patwa, an Afro-French creole, to English, the official language. Despite government efforts at Patwa revitalization and cultural heritage tourism, rural caregivers and teachers prohibit children from speaking Patwa in their presence. Drawing

on detailed ethnographic fieldwork and analysis of video-recorded social interaction in naturalistic home, school, village and urban settings, the study explores this paradox and examines the role of children and their social worlds. It offers much-needed insights into the study of language socialization, language shift and Caribbean children's agency and social lives, contributing to the burgeoning interdisciplinary study of children's cultures. Further, it demonstrates the critical role played by children in the transmission and transformation of linguistic practices, which ultimately may determine the fate of a language.

A legendary figure in the realms of public policy and academia, John Gilderbloom is one of the foremost

urban-planning researchers of our time, producing groundbreaking studies on housing markets, design, location, regulation, financing, and community building. Now, in *Invisible City*, he turns his eye to fundamental questions regarding housing for the elderly, the disabled, and the poor. Why is it that some locales can offer affordable, accessible, and attractive housing, while the large majority of cities fail to do so? *Invisible City* calls for a brave new housing paradigm that makes the needs of marginalized populations visible to policy makers. Drawing on fascinating case studies in Houston, Louisville, and New Orleans, and analyzing census information as well as policy reports, Gilderbloom offers a comprehensive, engaging, and optimistic theory of how housing can be remade with a progressive vision. While many contemporary urban scholars have failed to capture the dynamics of what is happening in our cities, Gilderbloom presents a new vision of shelter as a force that shapes all residents.

Explore a wealth of ideas, insights, and approaches that can be used or adapted by any medical library! Curricular changes in the health professions, coupled with a growing acceptance of the Internet as a tool for daily living, have contributed to a climate of change and opportunity for health sciences libraries. *A Guide to Developing End User Education Programs in Medical Libraries* will help graduate students in library science, entry-level medical librarians, and experienced educators to understand best practices and to build, expand, and improve medical library-sponsored educational programs. *A Guide to Developing End User Education Programs in Medical Libraries* is designed to aid and inform professionals who develop, teach, or evaluate end-user education programs in health sciences libraries. Eighteen case studies represent the ideas and approaches of more than fifteen private and public institutions in the United States and the Caribbean. The studies focus on effective end-user programs for medical information electives, veterinary medicine programs, health care informatics, and evidence-

based medicine, plus instructional programs for teaching residents, ThinkPad-facilitated instruction, and more. The guide also examines how several medical libraries have created and expanded their end-user education programs. The contributors to *A Guide to Developing End User Education Programs in Medical Libraries* are health sciences librarians from teaching hospitals, medical/dental/veterinary schools, and health professions-focused universities in a dozen U.S. states and the West Indies. Each of them is involved in designing, teaching, and evaluating user education. This book will help you educate students of medicine, pharmacy, physical therapy, dentistry, and veterinary medicine, plus residents and practicing health professionals. The educational objectives and approaches in the case studies include: clinical medical librarianship integrating informatics objectives into curricula developing credit and non-credit coursework distance learning using new and emerging technologies to improve instruction The case studies in *A Guide to Developing End User Education Programs in Medical Libraries* follow a format similar to that of the structured abstract, including introduction, setting, educational approaches, evaluation methods, future plans, conclusion, and references. Some are illustrated with tables and figures. Several are supplemented by material in chapter-specific appendixes. Further information about specific classes, programs, or teaching philosophies is made available via Web sites featured in the book. Let this valuable guide help you—and your institution—take advantage of the opportunities available at this exciting time in the evolution of library science!
