A new guide designed to ensure confident prescribing in specialist areas. The need for this text stems from the necessity to develop non-medical prescribing in practice. It offers a resource for all non-medical prescribers including nurses, pharmacists, optometrists, physiotherapists and other healthcare professionals who desire to become supplementary or independent prescribers in their field. The book is divided into two comprehensive sections and provides an overview of non-medical prescribing by healthcare professionals other than doctors.

The Safe Patient Handling and Mobility Standards establish a uniform, national foundation for safe patient handling and mobility to prevent injury to healthcare workers and healthcare recipients across the care continuum. These standards outline the role of both the employer and healthcare workers in safe patient handling and mobility. There are eight overarching standards featured in the book, each one outlined and explained in detail: Culture of Safety,

instructions to help them administer these drugs safely. Side effects information is logically organized by body system and identified as common or life threatening, alerting students to the signs to watch for during assessments. Nursing Process Framework organizes all nursing care steps so students learn how to easily and completely incorporate the nursing process into their clinical experiences. Cross-reference headers in the book listings and in the appendices make it easier to find the drug content quickly and less likely that students will think a drug is missing if it's not first found in the book. Complete pharmacokinetic tables explain the mechanism and absorption of the drug, as well as the action, duration, and excretion of the drug. NEW! Approximately 25 monographs on newly released, FDA-approved drugs give you the intricate details you need both in the classroom and clinicals. Each monograph includes new interactions, precautions, alerts, patient teaching instructions, and other need-to-know information — so you'll feel confident in the accuracy of the information and in preventing medication dispensing errors. NEW! Up-to-date content on drug therapies provides you with instant access to the latest information.

Geared to LPNs/LVNs, this quick-reference pocket book provides an easy-to-understand guide to ECG interpretation and features over 200 clearly explained ECG rhythm strips. Following a refresher on relevant cardiac anatomy, physiology, and electrophysiology, the book presents the 8-step method for reading any rhythm strip. Subsequent chapters explain various cardiac rate and rhythm abnormalities, including sinus node arrhythmias, atrial arrhythmias, junctional arrhythmias, ventricular arrhythmias, and atrioventricular blocks. Arrhythmias are covered in a consistent format—causes, significance, ECG characteristics, signs and symptoms, and interventions. Coverage also includes ECG characteristics of disorders, drugs, pacemakers, and implantable cardioverter-defibrillators and a chapter on basic 12-lead electrocardiography.

If a competent adult refuses medical treatment, physicians and public officials must respect her decision. Coercive medical paternalism is a clear violation of the doctrine of informed consent, which protects patients' rights to make medical decisions even if a patient's choice endangers her health. The same reasons for rejecting medical paternalism in the doctor's office are also reasons to reject medical paternalism at the pharmacy, yet coercive medical paternalism persists in the form of premarket approval policies and prescription requirements for pharmaceuticals. In *Pharmaceutical Freedom* Jessica Flanigan defends patients' rights of self-medication. Flanigan argues that public officials should certify

drugs instead of enforcing prohibitive pharmaceutical policies that disrespect people's rights to make intimate medical decisions and prevent patients from accessing potentially beneficial new therapies. This argument has revisionary implications for important and timely debates about medical paternalism, recreational drug legalization, human enhancement, prescription drug prices, physician assisted suicide, and pharmaceutical marketing. The need for reform is especially urgent as medical treatment becomes increasingly personalized and patients advocate for the right to try. The doctrine of informed consent revolutionized medicine in the twentieth century by empowering patients to make treatment decisions. Rights of self-medication are the next step.
