Covering all the major concepts and theories while still presenting the exciting and practical applications of psychology is a challenge. In order to meet this challenge, Huffman presents a fully integrated package that sets the stage for a perfectly choreographed learning experience. It includes a pedagogical system that makes psychology easier to learn. Readers will also find a robust suite of multimedia learning resources, including animations, interactive exercises, simulations and virtual experiments, and brief video clips. Psychologists can use the ninth edition as a reference for the theories and concepts.

Through four successful editions, this briefer book uses an approach which promotes learning as an "activity" of the reader - it shows how "active learning" can motivate and excite readers to a deeper understanding of introductory psychology. With balanced and modern treatment of gender and culture, this book encourages readers to develop "critical thinking" skills. It is organized around the SQ4R (survey, question, read, recite, review) method of learning.

Provides coverage of gender and cultural diversity. This book includes support material including crossword puzzles, matching exercises, and fill in the blank exercises following each modular. It features spiral bound workbook format.

An introduction to psychology course. The author's updating and integrated use of the SQ3R learning system (Survey, Question, Read, Rehearse, Review) help to make the text accessible. A comprehensive supplements package is available to help both students and instructors.
