Social research is generally normative emphasizing what is good for the society.

Significance of Research in Social Sciences - MBA ...

Research design provides the glue that holds the research project together. A design is used to structure the research, to show how all of the major parts of the research project — the samples or groups, measures, treatments or programs, and methods of assignment — work together to try to address the central research questions. Here, after a brief introduction to research design, I'll show you how we classify the major types of designs.
