Based on the popular Artech House classic, Digital Communication Systems Engineering with Software-Defined Radio, this book provides a practical approach to quickly learning the software-defined radio (SDR) concepts needed for work in the field. This up-to-date volume guides readers on how to quickly prototype wireless designs using SDR for real-world testing and experimentation. This book explores advanced wireless communication techniques such as OFDM, LTE, WLA, and hardware targeting. Readers will gain an understanding of the core concepts behind wireless hardware, such as the radio frequency front-end, analog-to-digital and digital-to-analog converters, as well as various processing technologies. Moreover, this volume includes chapters on timing estimation, matched filtering, frame synchronization message decoding, and source coding. The orthogonal frequency division multiplexing is explained and details about HDL code generation and deployment are provided. The book concludes with coverage of the WLAN toolbox with OFDM beacon reception and the LTE toolbox with downlink reception. Multiple case studies are provided throughout the book. Both MATLAB and Simulink source code are included to assist readers with their projects in the field.

Some of the best minds in Mariology today have collaborated to produce this monumental anthology in honor of Our Lady and in complete fidelity to the Magisterium. Buy this book and make a present of it to your parish priest, the religious sister you know, the seminarian from your diocese, or the consecrated person or educated layperson at your parish. It's a Mariological "must read," especially for our priests and seminarians. --Dr. Scott Hahn Author and Professor of Theology at Franciscan University of Steubenville

"Have you ever found yourself stretched too thin? Do you simultaneously feel overworked and underutilized? Are you often busy but not productive? Do you feel your time is constantly being hijacked by other people's agendas? If you answered yes to any of these questions, the way out is the way of the Essentialist. Essentialism isn't about getting more done in less time. It's about getting only the right things done. Only once we discern what is absolutely essential and eliminate everything else can we make our highest possible contribution toward things that truly matter. By forcing us to apply more selective criteria for where to spend our precious time and energy, the disciplined pursuit of less empowers us to reclaim control of our own choices, instead of giving others the implicit permission to choose for us. Essentialism is not one more thing to do. It's a whole new way of doing less, but better, in every area of our lives"--Back cover.
