(PDF) Larson - Trigonometry 7th  
edition | Marvin Castillo ...  
My school uses Larson books all the  
way from elementary algebra, up  
through Calculus. This Trigonometry  
book isn't bad, but it does lack well  
structured explanations in many areas.  
There are a lot of topics that show an  
example of one type of problem, but  
they don't really show how to  
manipulate the same concept into a  
different scenario.
